Jade Goldstein, Vibhu Mittal, Jaime Carbonell, Mark Kantrowitz

April 2000 **NAACL-ANLP 2000 Workshop on Automatic summarization - Volume 4****Publisher:** Association for Computational LinguisticsFull text available: [pdf\(837.37 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

This paper discusses a text extraction approach to multi-document summarization that builds on single-document summarization methods by using additional, available information about the document set as a whole and the relationships between the documents. Multi-document summarization differs from single in that the issues of compression, speed, redundancy and passage selection are critical in the formation of useful summaries. Our approach addresses these issues by using domain-independent techni ...
